RISK AND COMPLIANCE MANAGEMENT

## CLOUD SOLUTION FOR PRODUCTIVITY MONITORING

[www.searchinform.com](http://www.searchinform.com)

Productivity monitoring allows you to make sure that employee performance meets the requirements. Control of employee efficiency is indispensable in building a proper management framework.

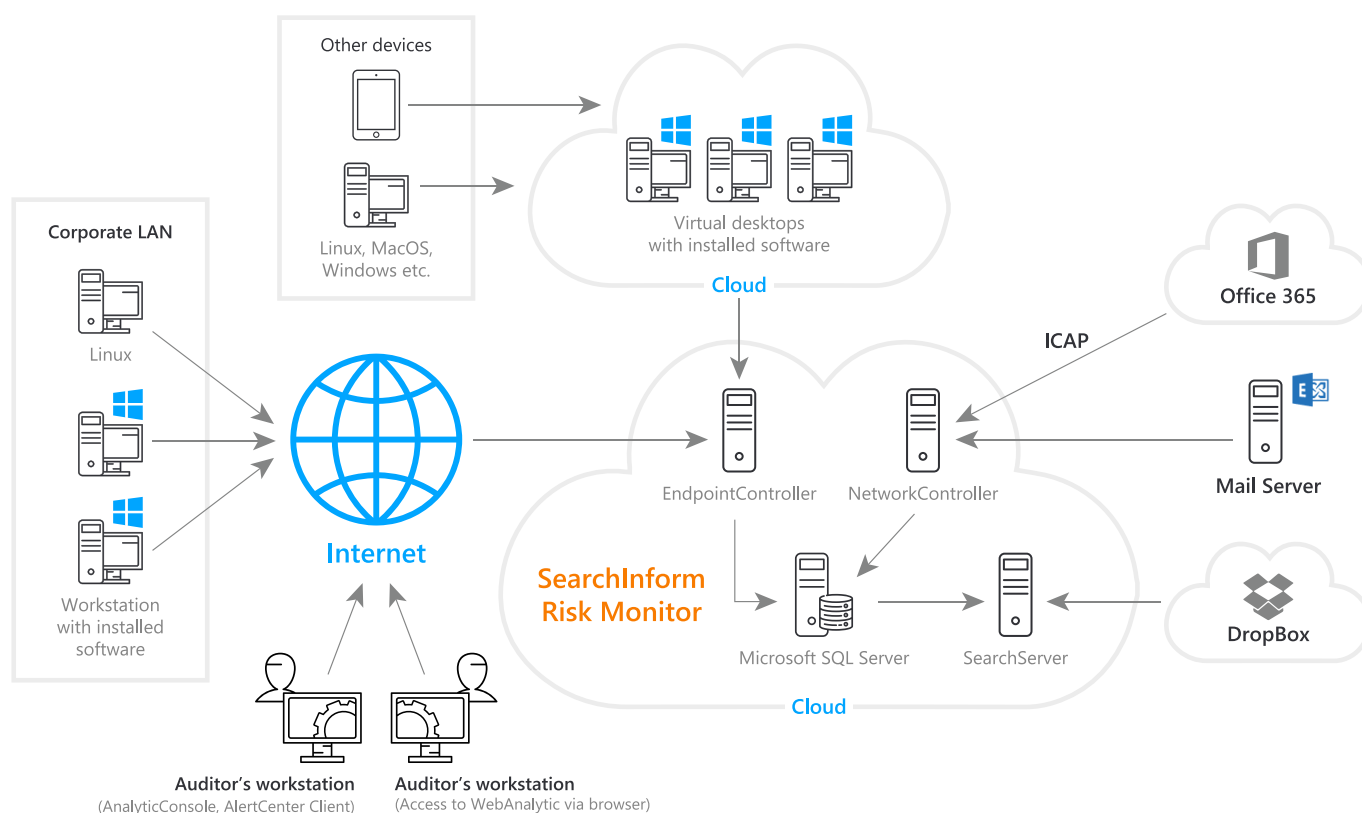

The special solution gives you a complete toolset to control employee work-related activities, identify and analyse them, and view them when it is necessary.

- **KNOWING WHICH APPLICATIONS ARE BEING USED FOR WORK RELATED ACTIVITIES DURING WORK HOURS**
- **MAKING SURE THAT APPLICATIONS ARE ACTIVE AND AREN'T RUNNING IN THE BACKGROUND**
- **PROVING THAT ADEQUATE TIME IS SPENT ON A PARTICULAR TASK**
- **SEEING AT WHICH HOUR AN EMPLOYEE COMES TO WORK AND LEAVES IT**

**HELPS YOU MONITOR PRODUCTIVITY AND ENSURES THE CORRECT ASSESSMENT OF YOUR TEAM**

Solution deployment in the cloud is conducted by SearchInform specialists

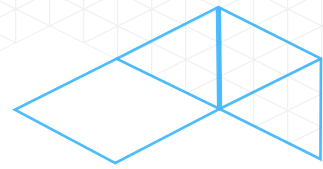

## MONITORING OF BUSINESS PROCESSES CAN BE LAUNCHED FAST AND EASY

Cloud deployment model implies that server and client's parts are located in the cloud infrastructure. The key requirement for such an infrastructure is the possibility to create a full-fledged Windows OS in the cloud and install the solution's components there.

The option of OS virtualising in the cloud is available in every large cloud platform, for example, Amazon Web Services.

At the same time all the technical requirements for ports, interaction protocols, network availability of controlled PCs, AD accounts and other official recommendations remain in force for both local and cloud deployment models.

## GAIN ACCESS TO

- Real time control
- Dozens of report templates will show you what and where should be improved to achieve goals
- Remote employee monitoring
- Email alerts
- Special Web interface to access results of monitoring while being outside the office

Benefit from the effortless access to the unlimited functionality – choose one of the cloud options below:

### SEARCHINFORM CLOUD

We install all SearchInform solution components. Data is processed and stored on SearchInform servers.

### OTHER CLOUD SERVICE

We place SearchInform components in the cloud chosen by the client. Data is processed and stored on the provider's side.
